

Nathan Marder

Senior Software Engineer | Full Stack, Platform & Reliability

Portland, OR | ntmarder@gmail.com | 808-372-4502

Professional Summary

Senior Software Engineer with 15+ years of experience building consumer-facing and enterprise software across frontend, platform, backend, and operational domains. Proven technical leader with experience delivering Walmart+ customer experiences, driving observability programs that reduced production incidents by more than 80%, and leading platform integrations supporting web and mobile applications.

Walmart | Senior Software Engineer (X4) | 2019–Present

- Promoted from Software Engineer III to Senior Software Engineer based on technical leadership, cross-team influence, and delivery of strategic Walmart+ initiatives.
- Led technical design and delivery of the Walmart+ Rewards History experience.
- Selected to lead a multi-year Operational Excellence initiative for the Walmart+ membership organization.
- Reduced production incidents by more than 80% through standardized monitoring, alerting, and operational review processes.
- Established organization-wide standards for latency, reliability, and performance measurement.
- Led weekly operational excellence reviews attended by 25–40 engineering managers and technical leads.
- Co-led migration from Splunk to OpenObserve across 6 engineering teams, migrating 300+ dashboards and 500+ alerts.
- Contributed to architecture and integration design for Walmart+ Family Sharing capabilities.
- Mentored engineers, conducted technical interviews, and supported onboarding and training initiatives.

Nike | Senior Software Engineer | 2018–2019

- Contributed to modernization of Nike authentication and account-management experiences.

Epiq Global | Senior Software Engineer | 2017–2018

- Developed full-stack solutions for legal technology and evidence collection platforms.

Navex Global | Full Stack Software Engineer | 2015–2017

- Developed enterprise compliance software used by 97% of Fortune 100 companies.
